New monograph 'Non-alcoholic fatty disease of the pancreas'

N. B. Gubergrits¹, T. N. Khrystych², O. A. Bondarenko³

¹*Donetsk National Medical University n. a. M. Gorky, Ukraine*

²*Bukovinian State Medical University, Ukraine*

³*Lviv National Medical University n. a. D. Galitsky, Ukraine*

Key words: pancreas, non-alcoholic fatty disease, metabolic syndrome, pancreatic cancer, hyperlipidemic pancreatitis

Content of the new monograph on recently released nosologic unit is presented. This monograph would be useful for the gastroenterologists, endocrinologists, family doctors, and therapeutics and internship doctors.

The monograph is devoted to the relatively new disease, which recently became an individual. Much attention is paid to the etiology, pathogenesis, diagnosis, treatment of this pathology. Since the non-alcoholic fatty pancreas disease occurs predominantly in the background of metabolic syndrome reflection, obesity, some chapters are devoted to the digestive system and, specifically, the pancreas, the metabolic syndrome, disease of the pancreas in patients with obesity and insulin resistance, the role of obesity and metabolic syndrome in the development of pancreatic cancer. Relation of exo-and endocrine functions of the pancreas was analyzed, since the violation of normal relations plays a significant role in the pathogenesis of nonalcoholic fatty pancreas disease.

This monograph would be useful for the gastroenterologists, endocrinologists, family doctors, and therapeutics and internship doctors.

Monograph content

List of abbreviation

Introduction

Chapter 1. The pathology of the digestive and metabolic syndrome

Chapter 2. Role of pancreatic pathogenesis of the metabolic syndrome

Chapter 3. Interaction of external and internal secretion functions of pancreas in normal and pathological conditions

Chapter 4. Nonalcoholic fatty pancreas disease: etiology, pathogenesis, clinical features, diagnostic

Chapter 5. Features of pancreatic diseases course with obesity and metabolic syndrome

Chapter 6. Obesity, metabolic syndrome, and pancreatic cancer

Chapter 7. Hyperlipidemic pancreatitis

Chapter 8. Treatment of nonalcoholic fatty disease of the pancreas

Conclusion
